NEO Cart

For You and Your Patient

NEO Cart

For You and Your Patient

VERSATILE AND EFFICIENT DENTAL TREATMENT SYSTEM

The Fimet Neo Cart is a modern and adaptable dental treatment system designed to meet the diverse needs of dental professionals.

Whether used as a standalone unit or in conjunction with the NEO patient chair, suction head, and spittoon, the Neo Cart offers seamless integration into any dental practice.

Its compact and ergonomic design allows for easy mobility also from room to room, making it an excellent choice for dynamic clinical environments where flexibility is key.

This brochure includes some optional features that are available for an additional cost.

WHY NEO CART MAKES SENSE?

- **Flexible & Mobile**
Easily reposition or transfer the unit as needed.
- **Standalone or Integrated Use**
Functions independently or with NEO treatment components.
- **Easy Installation**
Plug & Play setup for a seamless start.
- **Adjustable Height**
Motorized control for optimal ergonomics.
- **Hygienic & Efficient**
Wireless foot control reduces contamination risks.

Effortless Installation – Plug & Play Convenience

The Neo Cart is designed for quick and hassle-free installation, with a floor box integrated into the base for a neat and organized setup.

Thanks to its Plug & Play system, it requires only a 220V connection, water supply, and compressed air, ensuring effortless implementation in any treatment room.

Motorized Height Adjustment for Maximum Comfort

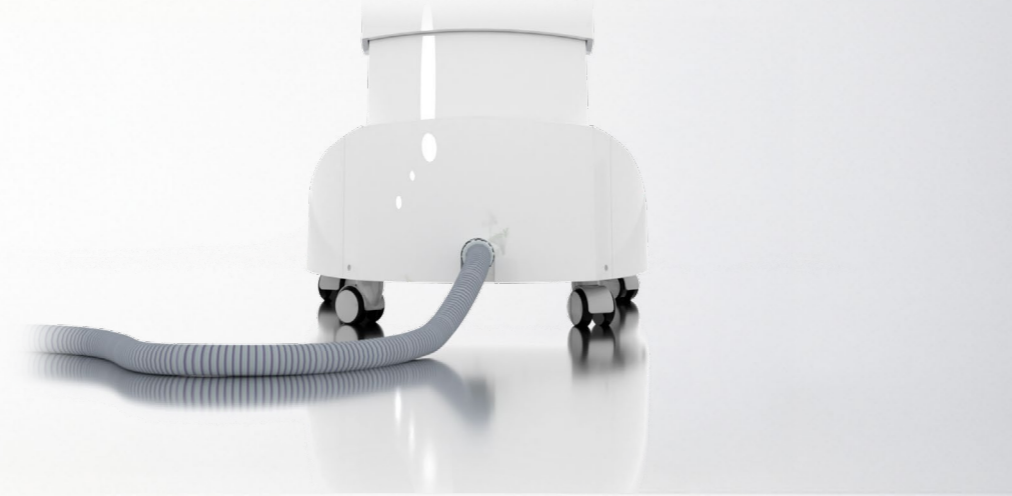

With an adjustable height range of 77–97 cm, the Neo Cart provides motorized height control, allowing users to tailor the working position to their preference.

This feature enhances ergonomic support, reducing strain and promoting a comfortable and efficient workflow for dental professionals.

Advanced Wireless Foot Control

The multifunctional wireless foot switch (available in both horizontal and vertical configurations) offers intuitive control over dental instruments and essential functions.

This hands-free operation minimizes cross-contamination risks, allowing practitioners to focus entirely on their procedures without needing to touch the instrument console during treatments.

PERFECT FOR VETERINARIAN OPERATIONS

This dental cart solution is also perfectly suited for pet dental operations. Designed to accommodate the needs of veterinary professionals, it provides the necessary tools for efficient and precise animal dental care.

Whether used for routine cleanings or more advanced procedures, this unit ensures a smooth workflow, helping veterinarians deliver high-quality treatment to their patients.

NEO *Cart*

The Fimet Neo Cart is designed to streamline dental workflows, enhance treatment efficiency, and provide unparalleled flexibility in any clinical setting.

Whether you require a permanent fixture or a portable solution, the Neo Cart delivers a sophisticated and reliable treatment experience.
